AtineSuite™

COMPLETE DIGITAL ENTERPRISE SUITE · ATINE LABS

AtineLabs
DIGITAL LANDMARKS FOR NATIONS
admin@atinelabs.tech

11 Integrated Platforms · One Vendor · One Support Team · SaaS · On-Premise · Hybrid · Africa · Caribbean · Pacific · Sovereign Cloud · Enterprise Bundle

What is AtineSuite™?

AtineSuite™ packages all Atine Labs flagship digital platforms into a single enterprise deployment. Each platform remains independently configurable while sharing a unified SSO identity layer, a common API gateway, and one integrated data infrastructure — eliminating silos and enabling real-time cross-platform reporting from day one.

Who It's For

Governments, ministries, hospitals, universities, NGOs, intergovernmental organisations, and large enterprises seeking to consolidate their digital operations under one vendor, one SLA, and one enterprise agreement — across HR, health, insurance, education, hospitality, parliament, events, and media broadcasting.

Intelligent broadcast management & internet radio platform

EMS + GATI
Events management with freelance interpreter booking portal

e-Parliament Platform
12-module digital democracy infrastructure for national legislatures

DEPLOYMENT MODELS

☁ SaaS Cloud

Fastest Deployment

Managed on Atine Labs infrastructure. Ideal for organisations beginning their digital transformation journey. Subscription-based pricing. Live within days.

On-Premise

Full Data Sovereignty

Deployed entirely within your own data centre or national cloud. No data leaves your jurisdiction. Recommended for governments and regulated health institutions.

Hybrid Sovereign

Best of Both

Core sensitive data on-premise; scalable workloads and analytics in the cloud. Supports disaster recovery, burst capacity, and geographic redundancy requirements.

⚡ Integration Advantages

- Single Sign-On (SSO) across all 11 platforms
- Unified API gateway — no custom middleware needed
- Real-time cross-platform dashboards & reports
- Shared user identity & access control layer
- Eliminate data duplication across departments
- One SLA, one support escalation path
- Mobile-first PWA on all platforms

Commercial Advantages

- Bundle pricing — significant savings vs individual licences
- Modular entry — start with 3 platforms, scale to all 11
- Phased rollout plan included in enterprise agreement
- Dedicated solutions architect throughout deployment
- Local capacity building & staff training included
- Annual subscription or perpetual licence options
- Partnership tiers for resellers & implementation partners
