E-Governance | 12 Core Modules | Uganda — First Cohort | Africa · Caribbean · Pacific | Sovereign Cloud | Open Standards

Platform Overview

A comprehensive, end-to-end e-Parliament infrastructure platform that transforms national legislatures into digitally-capable, transparent, and citizen-responsive democratic institutions. Built with the Parliament of Uganda as the inaugural cohort and designed for scalable deployment across African, Caribbean, Pacific, and Global South parliaments.

Who It's For

National parliaments, legislative assemblies, regional councils, and intergovernmental legislative bodies seeking digital transformation — including chamber digitisation, public engagement, legislative workflow automation, and transparent governance platforms.

12	54+	8+	100%
CORE MODULES	AFRICAN PARLIAMENTS	LANGUAGES SUPPORTED	CLOUD-NATIVE

12 CORE PLATFORM MODULES

MODULE 01
Digital Hansard & Debates Archive
Searchable transcript & video archive of all plenary sessions

MODULE 02
Electronic Voting System
Secure digital division management with real-time tally display

MODULE 03
Bill Tracking & Legislative Workflow
End-to-end bill lifecycle from introduction to assent

MODULE 04
Committee Management
Committee schedules, membership, minutes & reports

MODULE 05
MP Constituent Portal
Member profiles, attendance records & constituency mapping

MODULE 06
Public Petitions Portal
Citizen-facing platform for filing & tracking petitions

MODULE 07
Live Streaming & Media Archive
Real-time chamber broadcasting with on-demand replay

MODULE 08
Budget & Finance Oversight
Budget allocation tracking & public spending transparency

MODULE 09
Document Management System
Parliamentary papers, gazettes & official document repository

MODULE 10
Inter-Parliamentary Liaison
Bilateral & multilateral parliamentary diplomacy portal

MODULE 11
Cybersecurity & Compliance
Role-based access, audit trails & data sovereignty controls

MODULE 12
Analytics Dashboard
Participation metrics, voting patterns & legislative productivity

⚡ Technical Highlights

- 100% cloud-native — deployable on sovereign national cloud
- API-first architecture with open-standard integrations
- Multilingual UI supporting 8+ languages (incl. Luganda, French, Arabic)
- End-to-end encrypted data transmission & storage
- Mobile-responsive PWA — accessible on any device
- FOSS-friendly: built on open-source components
- SSO & Active Directory / LDAP integration

Deployment Advantages

- Configurable per-parliament branding & constitution
- On-premise, cloud, or hybrid deployment options
- Data sovereignty — no data leaves national jurisdiction
- Inclusive staff training & capacity building programme
- Modular licensing — start with 3 modules, scale to all 12
- Dedicated parliamentary IT team onboarding
- 24/7 technical support with local implementation partner

IMPLEMENTATION ROADMAP

1

DISCOVERY

Parliamentary needs assessment, constitutional alignment & technical scoping

2

DESIGN

Custom UI/UX, data migration plan, module selection & architecture sign-off

3

DEPLOY

Infrastructure setup, module deployment, staff training & UAT sign-off

4

SCALE

Full go-live, additional module rollouts & inter-parliamentary network integration
